PROFESSIONAL SUMMARY

Computer Science student and developer with hands-on experience in AI/ML, Computer Vision, and full-stack web and mobile development. Skilled at building intelligent systems and data-driven solutions using modern frameworks across Python and JavaScript ecosystems.

EDUCATION

SZABIST Islamabad

Bachelor of Science in Computer Science — CGPA: 3.33/4.0
– Currently in 7th Semester

Islamabad, Pakistan
2023 – 2027

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, Dart
Frontend: React, Flutter
Backend & APIs: Node.js, Express.js, Fastify, FastAPI
Databases: PostgreSQL, MongoDB, MySQL
Data Science & ML: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Tools & Platforms: Git, GitHub, Roboflow, YOLOv8

PROFESSIONAL EXPERIENCE

Software Development Intern

App In Snap

Gulberg Greens, Islamabad
June 2025 – September 2025

- Built a disease prediction model using Scikit-learn as part of a structured internship assignment.
- Developed a vehicle detection system using YOLOv8 and performed image annotation using Roboflow.
- Designed and implemented an NL-to-SQL chatbot to assist database engineers with natural language queries.

Flutter Developer Intern

VersionBee Private Limited

Remote
January 2026 – Present

- Developing the mobile UI for *Trimmers Barber App* using Flutter, implementing responsive layouts and core user-facing screens.

PROJECTS

Truck Dispatching & Analytics Hub | *React, FastAPI, PostgreSQL, Flutter*

2025 – Present

- Full-stack platform for managing truck dispatch operations with real-time analytics.
- Architected a multi-branch repository (client, server, mobile) with a structured QA pipeline on GitHub.
- Backend built with FastAPI and PostgreSQL; mobile client developed in Flutter/Dart; web client in React.

NL-to-SQL Chatbot | *Python, FastAPI, NLP*

2025

- Built a natural language interface that converts plain English queries into executable SQL statements.
- Designed specifically for database engineers to speed up query writing and reduce manual effort.

Vehicle Detection System | *Python, YOLOv8, Flutter*

2025

- Built a vehicle detection system for the toll plaza that detects the vehicle and collects the toll automatically.
- Designed specifically to automate the toll collection process. Currently working on Mandra toll plaza Pakistan.
